

Maxim Morev

Frontend Developer · Tech Lead / 16+ years experience

✉ max.seainside@gmail.com [Telegram](#) [GitHub](#) [YouTube](#)

Summary

Senior frontend engineer with **16+ years** of experience, working across freelance, startups, and agency environments. Experienced both as an individual contributor and technical leader.

Built and evolved frontend systems end-to-end: from architecture and standards to production delivery and scaling. Focused on frontend architecture, reusable modules, and engineering quality across multiple projects.

Developed design systems and UI components with focus on usability and accessibility (a11y). Improved cross-team collaboration by aligning frontend, backend, and design through shared practices and workflows.

Actively contribute to the community through **open-source**, technical writing, and **educational content**.

Experience

Runway — Lead Frontend Engineer / Aug 2020 – Dec 2025 (5 years 5 months)

- Standardized **frontend architecture** across company projects, enabling flexible developer rotation between teams
- Designed and implemented **design systems** and **UI kits** with focus on theming, responsiveness, and **accessibility (a11y)**
- Introduced **spec-first development** and unified API contracts via **OpenAPI (Swagger)**, enabling parallel frontend/backend work
- Established engineering standards: **ESLint**, **Stylelint**, **Commitlint**, **Conventional Commits**, **CI/CD** pipelines
- Improved **developer experience**, **performance**, and **product quality** across multiple projects
- Conducted **code reviews**, mentoring, pair programming, and internal tech talks
- Participated in hiring and onboarding, and established **engineering guidelines** and **internal documentation**

TypeScript Vue / Nuxt React / Next.js SSR SCSS Storybook Sentry Docker Vitest Playwright Figma

Prostudio — Lead Developer, Fullstack Engineer / Jan 2017 – Jun 2020 (3 years 6 months)

- Built **3 startup projects from scratch** (idea – MVP – early product iterations)
- Defined **architecture and tech stack** for new products
- Led a team of 5 developers:** task planning, prioritization, and delivery
- Established **development processes**, documentation, and QA practices
- Combined hands-on development with **team leadership** and **stakeholder communication**

Webpack JavaScript Vue CSS / SCSS Laravel

Freelance — Web Master / May 2009 – Dec 2016 (7 years 7 months)

- Delivered **landing pages**, **corporate websites**, **e-commerce projects**
- Integrated with **WordPress**, including custom plugins
- Connected projects to **analytics systems**, **CRM**, and **third-party APIs**
- Built **internal tooling** and **starter kits** for scalable development workflows
